

I am writing on behalf of K-Love radio. I am an avid supporter and listener of K-Love as are my children and grandchildren. I was so glad many years ago when K-Love became a high powered station. It serves to uplift so many people with positive music and information. It would be awful to return to a LPFM station. I live near a mountan and I would not get good reception if that happened. I know so many people in our community who benefit greatly by K-Love everyday. It is especially important to teenagers. It puts a positive message into their hearts every time they have it on. It would produce a BIG negative if we did not have this opportunity to hear K-Love on a high powered system. I beg of you to please Do Not displace this station with a LPFM. Thank you so much for considering all of us who look forward to hearing this station every day. It means so much to us
